Disable Follow Schedule

MODEL: Rheem or Ruud

If you have a Rheem or Ruud water heater that is connected to Wi-Fi via your EcoNet application, you will have to disable the "Follow Schedule" function on your EcoNet account to participate in WatterSaver.

EcoNet's "Follow Schedule" function will follow a user set schedule, but it overrides WatterSaver's ability to connect to a water heater. If your water heater isn't connected to the program, you may miss out on your \$5 monthly participation reward.

If you have questions about how to connect your water heater to WatterSaver or WatterSaver water heater eligibility, please contact the WatterSaver team at support@watter-saver.com.

Instructions

3. Turn off Follow Schedule on the slider at the bottom of the screen.
